[1] Where have we written out criteria for placing on list?

-JD Wessling

it isn't listed anywhere - any potential project that we want to track has been added. I am thinking that we could develop some instructions and definitions as another sheet for reference.

PS if you click the document icon at the top right of google drive opening page you can change to a file listing where it shows the latest modification,

-Pat Stark

Thanks. It might be useful for future members to have a doc identifying our criteria for listing a project. If you'd like I'll draft something as a starter for the criteria.

Go right ahead. My first thought is that each column heading should ultimately have a spot in the instructions. - I added a sheet and started a format but not sure I like it - Feel free to modify as you see fit.
